CO-CREATION

Design thinking

Design =

the transformation of existing conditions into preferred ones

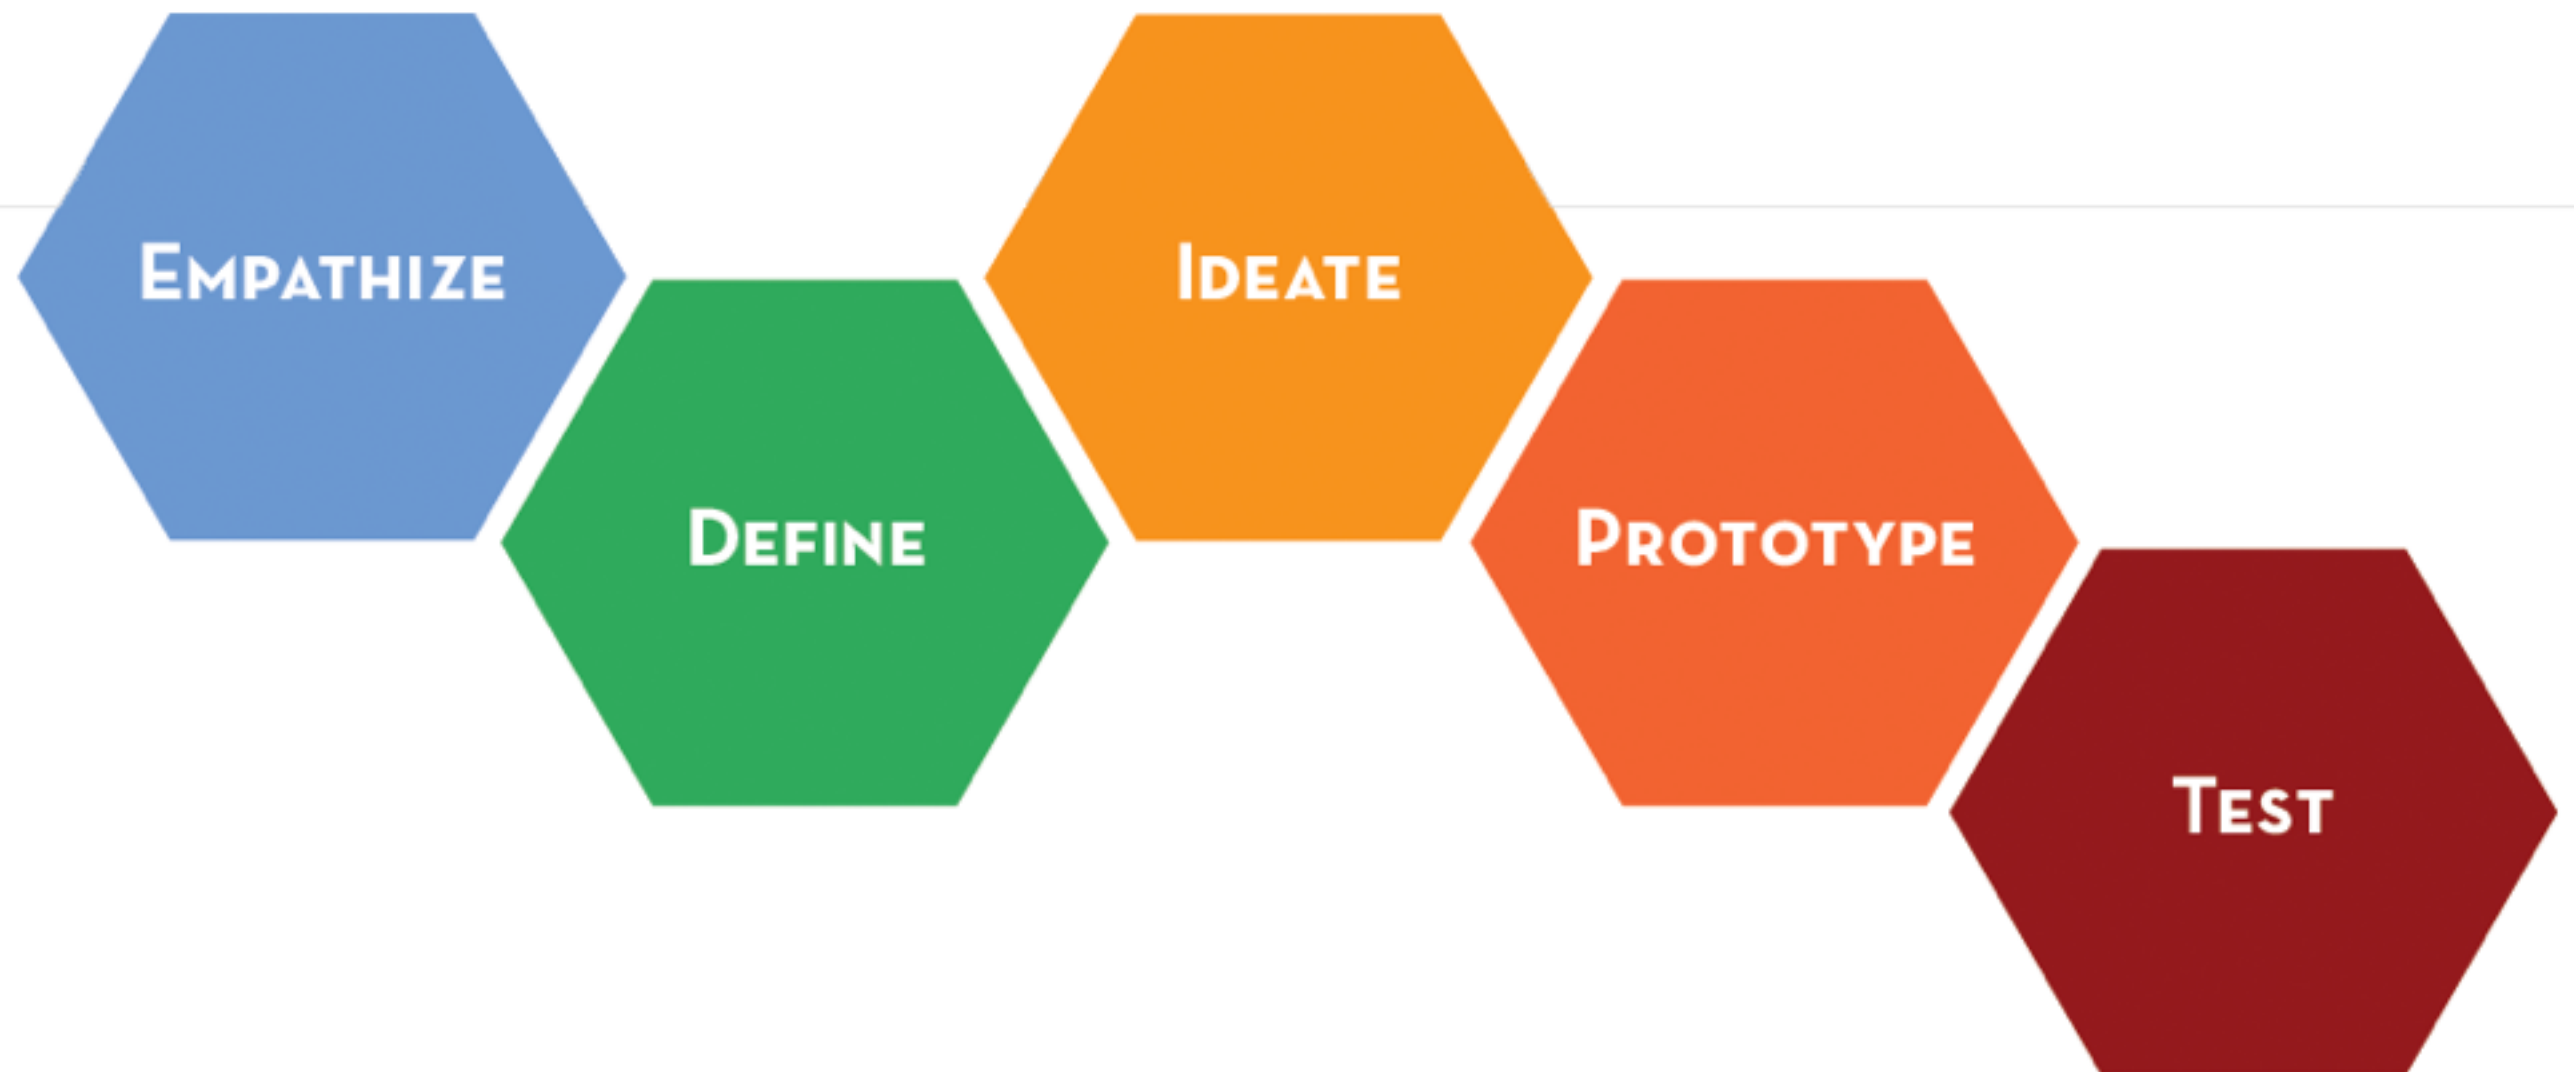

Herbert Simon, in the "Sciences of the Artificial" (MIT Press, 1969)

- Design thinking is, then, always linked to an improved future
- There are no judgments in design thinking!
- Wild ideas are welcome, since these often lead to the most creative solutions!

Everyone is a designer, and design thinking is a way to apply design methodologies to any of life's situations.

Design Thinking Process

empathy for the context of a problem,
creativity in the generation of insights and solutions
rationality in analyzing and fitting various solutions to the problem context
